

## NumericVerifier.java

```
1 package project;
2
3 import java.awt.Color;
12
13 /* This is used to validate the Input Field for Numbers */
14 public class NumericVerifier extends InputVerifier {
15     Border originalBorder=null;
17     public boolean verify(JComponent input) {
31
32     /* This will be used to check the validation by the above method and then
33     * displaying popup message for the user and if validation fails , this should
put
34     * red rectangle around the input field*/
36     public boolean shouldYieldFocus(JComponent input) {
55
56 }
57
```
